RISK FACTORS

Investments in the Bonds involve inherent risks. These risks include, but are not limited to, risks attributable to the Issuer and the Group's operations, regulatory and financial risks and risks relating to the Bonds.

The description below is based on information available as of the date of this Prospectus. In this section the Issuer's material risk factors are illustrated and discussed. In each category of the below section, the most material risk, in the assessment of the Issuer based on the probability of their occurrence and the expected magnitude of their negative impact, are presented first. The subsequent risk factors are not ranked in order of materiality or probability of occurrence and thus presented in no particular order.

The manner in which the Issuer and the Bonds are affected by each risk factor is illustrated by way of an evaluation of the materiality of the relevant risk factor based on the probability of it occurring and the expected magnitude of its negative impact, for the purpose of which the probability is estimated as "low", "medium" or "high" and the magnitude of negative impact if it would occur as "low", "medium" or "high". The risk factors are grouped in certain categories and the most material risk factor in each category is presented first under that category. Subsequent risk factors in the same category are not ranked in order of materiality. Please note that in the event that several risks occur at the same time, this may lead to material consequences, irrespective of if the impact of each such risk taken in isolation is classified as being low, medium or high (see risk factor "Economic downturn as a result of risk accumulation" below).

Regardless of whether the Issuer has estimated the probability of a risk factor occurring or the expected magnitude of its negative impact as "low", "medium" or "high", all risk factors included in this section have been assessed to be material and specific to the Issuer and/or the Bonds in accordance with the Prospectus Regulation.

Before making a decision to invest in the Bonds, any potential investor should carefully consider the risk factors outlined below, as well as evaluate external factors, and make an independent evaluation.

Risks relating to the Group's business operations

Risks relating to the economic and political conditions in Europe

The Group operates across a number of jurisdictions across Europe, including, inter alia, the Nordic countries, France, Switzerland, Germany and the United Kingdom (the "UK"). Accordingly, the Group is exposed to adverse changes in economic conditions across Europe or in the individual countries in which it operates. In addition, adverse economic conditions in any other country which, in turn, affects the economies or markets in which the Group operates would be likely to have an adverse effect on the Group's business. Factors that could have an adverse effect on the general conditions on the markets and reduce economic activity in Europe include changes in the political situation, a decline in the rate of employment, confidence of consumers and businesses in the future, household disposable income, household debt, house prices, currency markets, inflation, the availability of loans and cost of borrowing, liquidity on the financial markets, and market interest rates. The Group's business is reliant on the hospitality sector which is in turn dependent on business travel as well as discretionary expenditure by consumers. Worsening market conditions, a decline in economic activity and/or changes in the general political situation in Europe could reduce the need for business travel and the amount of discretionary expenditure of consumers, and therefore the demand for the Group's products and services, resulting in an adverse effect on the Group's business, financial position and results of operations.

The Company assesses the likelihood of the above mentioned risks occurring to be medium. If the risks were to occur, the Company considers the potential negative impact to be medium.

Risks relating to Brexit

While the Group's business in the UK has so far been relatively unaffected by the UK's exit ("Brexit") from the European Union (the "EU"), the formal exit from the EU and the European Economic Area is relatively recent, and the long term effects are unknown. If Brexit were to lead to restrictions and tariffs on the provision of services by EU companies, such as the Group, in the UK, or if Brexit were to lead to a severe and prolonged economic down turn or recession in the UK, revenues from its services in the UK, which for the year ended 31 December 2020 represented approximately 20 per cent. (including Acentic Holdings Ltd pro forma for the full

year) of the total revenue of the Group, may be significantly reduced. Furthermore, the loss of one of the EU's largest economies through Brexit may have a significant effect on the economies of EU countries leading to reduced spending power and consumer confidence resulting in a loss of occupancy at the Group's customers business. The materialisation of any of the above risks may have a significant impact on the revenues, profitability and/or growth prospects of the Group.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Any significant outbreak of any contagious disease could significantly damage the Group's business

The economies of the countries in which the Group operates may be negatively affected by an outbreak of any contagious disease with human-to-human airborne or contact propagation effects, such as COVID-19, that escalates in a regional epidemic or global pandemic. The occurrence of an epidemic or pandemic is beyond the Group's control and the Group can provide no assurance on the future spread of COVID-19 or other contagious diseases in areas in which the Group and its customers and suppliers operate, or what the impact on the Group's business will be. As at the date of this Prospectus, concerns regarding COVID-19 have had an adverse impact on the Group's business through the loss of new sales, and, in the medium to long term, if the spread of COVID-19 is prolonged, or further diseases emerge that give rise to similar macroeconomic effects this may result in material and prolonged disruptions to the Group's business, primarily through its customers loss of business, leading to low occupancy, reduced need for the Group's services and potential insolvencies and closures of the Group's customers business. The Group experienced a loss of new sales of approximately 24 per cent. in 2020 compared to 2019. However, reduced churn has increased its recurring after sales services and the prevalence of staycations has reduced the negative effect on the hotels and accommodation run by the Group's customers. However, if current levels of economic deterioration and volatility continue or worsen, and prolonged lock downs in the key geographies covered by the Group's customers occur, the Group may experience an adverse impact on sales, which may significantly reduce its revenue and as a result have a material adverse effect on its business, results of operations and financial condition.

The Company assesses the likelihood of the above mentioned risks occurring to be medium. If the risks were to occur, the Company considers the potential negative impact to be medium.

Intellectual property rights

The Group develops its own software and depends on intellectual property rights relating to products and services offered to protect the revenues related to such software. The Group has no registered intellectual property rights other than trademarks and a few patents held in France. Instead, the Group relies on protecting its unregistered intellectual property rights, software and source codes through copyright, IPR undertakings and confidentiality undertakings by employees and regulations relating to the protection of trade secrets. Such agreements and undertakings may be breached and/or may not have adequate remedies. If the Group's competitors independently develop equivalent knowledge, methods and know-how, it may be difficult for the Group to ensure its rights. Should the Group not be able to maintain its intellectual property or should the intellectual property be infringed upon by a third party, this could have an adverse effect on the Group's business, earnings and financial position.

The Group is dependent on being able to operate its business without infringing on the intellectual property rights of others. If a third party were to challenge the Group's use of certain software, processes or techniques, there is a risk that a court or other authority may deem that such use is in violation of that third party's intellectual property rights. Any such adverse ruling could lead to negative consequences such as the Group being forced to pay damages or licensing fees or to stop using the relevant software, processes or techniques altogether. Should this risk materialise, it could have an adverse effect on the Group's business, earnings and financial position.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Negative publicity

The Group relies on its brands to maintain and attract new customers and employees, and to retain existing customers. Any negative publicity or announcement relating to the Group may, whether or not it is justifiable,

deteriorate the brand value and have a negative effect on net sales, earnings and financial position. Furthermore, any defects in the services provided by the Group to its customers, or loss of contracts with key service providers may lead to a weakening of the Group's brand. The Group is particularly exposed to this risk through its use of local sub-contractors for the Group's installation services, as it has less control over such sub-contractors than over its own employees. Any such weakening of the Group's brand could lead to a loss of existing customers and indirectly to a loss of new sales. Such losses may result in a significant adverse impact to revenues and profitability through a resulting decrease in the price the Group is able to charge for its services.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Risks related to licences for digital television offering

The Group currently licences certain digital programmes for its digital television offering. For the year ended 31 December 2020 the Group's content business represented approximately 22 per cent. of Group turnover. The Group may be unable to obtain or retain attractive content in the future on favourable terms, or at all. The Group's inability to obtain or retain attractively priced, competitive programming in its networks could reduce demand for its existing and future television services, thereby limiting its ability to maintain or increase revenue from these services. In the event that the licences with any of these key providers are terminated, or such providers fail to produce content of sufficient quality and interest, it may be difficult to replace such providers at commercially viable costs or at all. The inability to obtain, improve or retain digital television content could result in a loss of its competitive position and the loss of existing customers or an inability to find new customers thereby having an adverse effect on the Group's operations, earnings and financial position.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be medium.

Key employees and managers

The Group is dependent on management and other key personnel with detailed knowledge of the Group and its industry, including software developers and international sales representatives in particular. Finding, recruiting and training qualified staff can take time and be costly and there is a risk that the Group will not be able to maintain or recruit sufficiently experienced or skilled personnel to a sufficient extent. If the Group fails to continue attracting, retaining and/or recruiting international sales representatives, software developers and/or other key personnel on acceptable terms or if such key personnel is approached by competitors, the Group may fail to maintain and further develop the standard expected of its business. Any decrease in the standard of the Group's services may negatively affect the prices it can charge for those services, or lead to unexpected costs resulting in a loss of profitability.

The Company assesses the likelihood of the above mentioned risks occurring to be medium. If the risks were to occur, the Company considers the potential negative impact to be low.

Ability to deliver on road map

The Group's products are based on continuous technological developments and improvements. It is of major importance that the Group's technological solutions are developed in such a way that their functionality meets customers' demands and requirements and the Group intends to continue to develop its products and range of products. The amount of time and costs involved in developing existing and new products can be difficult to establish in advance with any degree of precision. Accordingly, there is a risk that a planned development of a product will be more expensive and take longer to adapt to the needs of the market than planned. If the Group is either fully or partly unable to carry out its continuous development in accordance with its established road map, this could have an adverse effect on the Group's future earnings and profitability. In addition, there is a risk that future technological developments will not be successful or accepted by customers potentially leading to a significant reduction in revenue, and there is also a risk that any new technology will not be able to be implemented without causing disruptions to the business leading to unexpected costs and a reduction of profitability and potentially damage to the Group's reputation.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Risks related to acquisitions

The Group intends to continue its drive towards consolidation of its industry in the geographies it operates and elsewhere. Accordingly, it intends to take advantage of potential opportunities to grow by way of acquisition as well as organic growth. Acquisitions themselves may present certain financial, managerial and operational risks, including diversion of management's attention from existing core business, difficulties when integrating or separating businesses from existing operations and challenges presented by acquisitions which may not achieve sales levels and profitability that justify the investments made. Furthermore, risks or deficiencies in targets' businesses may not be identified during the due diligence process, or expected synergies may not be realised. If acquisitions are not successfully integrated and expected benefits to the Group achieved, the Group's business, financial condition and results of operations may be adversely affected. Future acquisitions could also result in dilutive issuances of the Group's equity securities, the incurrence of debt, contingent liabilities, amortisation costs, impairment of goodwill or restructuring charges, any of which could harm the Group's financial condition or results of operations.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Risks related to IT infrastructure

The Group depends on information technology ("IT") systems to manage critical business processes, including the offering of its services as well as administrative and logistical functions within the Group. In addition to IT systems offered externally to its customers, the Group uses IT systems for internal purposes. Extensive downtime of network servers, attacks by IT-viruses or other disruptions or failure of IT systems are possible and could have a significant negative impact on the Group's operations. Failure of the Group's IT systems could cause transaction errors and loss of customers and sales which could have negative consequences for the Group, its employees, and those with whom the Group does business.

The Group has business continuity and recovery procedures in place in the event of a failure or disruption of, or damage to, the Group's communication or IT systems. However, there remains a risk that such procedures may not be sufficient to ensure that the Group is able to carry on its business in the ordinary course of business if they fail or are disrupted and hence the Group may not be able to anticipate, prevent or mitigate any material adverse effect of any failure on its operations or financial performance, which could have an adverse effect on the Group's business, earnings and financial position.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be medium.

Risks related to insurance

The Group considers its insurance coverage to conform to market practice for companies in the market of the Group. However, insurance fully covering political risks and many other risks relating to the Group's business is not generally available to the Group or to other companies in the industry. No assurance can be given that any insurance policies will continue to be available, or that they will be available at economically feasible premiums.

The actual losses suffered by the Group may exceed the Group's insurance coverage and would be subject to limitations and excesses, which could be material. The realisation of one or more damaging event for which the Group has no or insufficient insurance coverage may have a material adverse effect on the Group's business, financial condition, or results of operations.

Moreover, any claims the Group makes under one of its insurance policies or the occurrence of an event or events resulting in a significant number of claims being made may also affect the availability of insurances and increase the premiums the Group pays for its insurance coverage. Hence, if the Group is unable to maintain its insurance cover on terms acceptable to it or if future business requirements exceed or fall outside the Group's insurance coverage or if the Group's provisions for uninsured costs are insufficient to cover the final costs, there is a risk that it will adversely impact the Group's operations, earnings and financial position.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Risks related to the Group's suppliers

The Group's products consist of components from a number of suppliers such as software and hardware suppliers. In order to develop, sell and deliver products, the Group is dependent on suppliers meeting agreed requirements as regards for example quantity, quality and delivery times. The lack of access to the Group's suppliers or price increases imposed by suppliers, which the Group is unable to pass on to its customers, or other circumstances affecting the Group's access to products on commercially reasonable terms, may have an adverse effect on the Group's business, financial position and results of operations.

Furthermore, the Group is reliant on key suppliers for hardware, content and installation services with 37.7 per cent. of its revenue being dependent on the largest ten suppliers in 2020. The ability of the Group to replace such providers at short notice, on acceptable terms or at all is limited by the small number of such suppliers. Therefore any loss of existing suppliers or failure to replace such suppliers on acceptable terms may lead to interruptions in the Group's services, loss of customers and/or loss of profitability.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Risks relating to the Group's customers

The Group's top ten customers are primarily large hotel chains, which represented approximately 26 per cent. of the Group's revenues during both 2019 and 2020. The loss of any such key customers for any reason, if not replaced by equally profitable customers, would have a significant negative impact on the Group's revenue. Furthermore, particularly due to the current situation relating to the COVID-19 outbreak, the Group's customers in the hospitality business are under severe pressure to stay in business, therefore leading to a potential pressure on prices they are willing to pay for the Group's services, as well as cash flow problems leading to difficulty paying the Group's invoices for their services. The lack of travel, lock downs of societies, and a general aversion to traditional hotel-based tourism as a result of COVID-19 and environmental issues may trigger a number of insolvencies at hotel chains and other players in the hospitality industry, potentially resulting in defaults or delays in payment, thereby significantly negatively impacting the Group's cash flow and revenues.

The Company assesses the likelihood of the above mentioned risks occurring to be medium. If the risks were to occur, the Company considers the potential negative impact to be low.

Risks relating to the Group's market

Technological development

The industry in which the Group operates is characterised by rapid technological development and digitalisation. To remain competitive, the Group must keep up with this development and continue to launch new services and increase and improve functionality, availability and features of its existing service offerings and network, e.g., by ensuring that its software can handle the increasing demand for bandwidth-intensive services. Any inability to achieve such objectives, and to take advantage of the advances in digitalisation, could lead to a loss of competitive edge and potential loss of existing customers or new business, resulting in an adverse effect on the Group's business, financial conditions and results of operations.

Costs associated with future service offerings, new technological developments and the operation of the Group's existing and future networks and technologies may also increase, due to many factors. Some of these are outside of the Group's control, including additional requirements for bandwidth, complexity of new solutions and potential incompatibility with the Group's current systems. The level and timing of future operating expenses may differ materially from current estimates due to various factors, many of which are beyond the Group's control. Such costs may reduce profitability significantly. Furthermore, any inability to fund these costs could have an adverse effect on the Group's business, financial conditions and results of operations.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be medium.

Competitive landscape

The Group has a number of competitors across different product categories, segments and geographic markets. The Group currently competes directly against operators within the same product field, such as for example

Oracle and Guest-tek in the property management software and networking areas, respectively. The hospitality services market is fragmented with a large number of local participants, and is therefore undergoing a trend of consolidation. Accordingly, there is a risk that the Group's consolidation plans are not successful or that other competitors are able to consolidate more quickly, thereby obtaining better economies of scale and pushing prices down. This could force the Group to lower its prices to remain competitive thereby impacting profitability and revenues. Furthermore, it is possible that the Group's competitors will be able to adapt their products more quickly than the Group to new applications or new markets or may be able to utilise the opportunities provided by digitalisation more quickly or efficiently than the Group. Furthermore, a rapid increase in foreign competition from lower-cost regions, could lead to a loss of customers, intensify price competition, and weaken the Group's revenues and profitability.

Intensifying competition, competing solutions, changes to pricing or demand or other changes to the competitive situation could have a material adverse effect on the Group's revenues and profitability.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Legal, environmental and regulatory risks

Risks related to the Payment Card Industry Data Security Standard

Many of the Group's customers handle credit cards that are subject to the standards of the PCI Security Standards Council which the Group must satisfy e.g. in developing its software to be eligible to supply products to these customers. The Group makes investments in order to meet these standards including investments required to satisfy changes adopted from time to time in their respective standards and criteria. Further investments may be costly, and if the Group is unable to continue to meet these standards and criteria, the Group may become ineligible to provide products and services that have constituted in the past an important part of the Group's revenues and profitability. If the Group were to lose its PCI certification the Group could lose a substantial number of its revenue sources or existing customers or its ability to gain new customers, any of which could adversely affect the Group's operations, earnings and financial position.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Risks relating to the bonds and the security structure

Risks relating to distributions and transfers of value

Under the terms and conditions of the Bonds (the "**Terms and Conditions**"), the Group is prohibited from making distributions or transfers of value (e.g. pay dividends on its shares, redeem its share capital and to repay any shareholder debt, including vendor notes issued by the Issuer to its shareholders) except (i) payments under vendor loans and earn-out obligations (from 1 January 2022), (ii) instalments under an existing shareholder loan or (iii) following a Qualifying IPO (as defined in the Terms and Conditions), in each case provided that the distribution test (the "**Distribution Test**") is met. The Distribution Test is met if the Group's leverage is not greater than 3.00x and no event of default is continuing or would occur due to the relevant distribution or transfer of value. If the Distribution Test is met, the Issuer may transfer available funds to its shareholders, having an adverse effect on the Group's assets and liquidity as well as the Issuer's possibility to make payments under the Bonds and the position of the Bondholders. In addition, there is a risk that the Group makes permitted disposals of assets and applies the proceeds towards making distributions or transfers of value to its shareholders, having an adverse effect on the financial position of the Group, the position of the Bondholders and the Issuer's possibility to make payments under the Bonds.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be medium.

Risks relating to disposals of assets

The Group shall under Terms and Conditions procure that no Group Company will, sell or otherwise dispose of any shares in any Group Company or of any assets (including but not limited to material intellectual property

rights) or operations to any person not being the Issuer or any of its wholly-owned Group Companies. However, the Group may dispose of such assets and provided that the Distribution Test is met distribute any proceeds received from such disposal, if such transaction is carried out at fair market value and on terms and conditions customary for such transaction and provided that it does not have a material adverse effect on the Group's business and that the shares in Hoist Group Holding AB are not disposed of. Although the Group's ability to dispose of its assets is thus subject to certain limitations, there may be a risk that the Group will dispose of, and distribute funds from, assets significant for the Group's business which could have an adverse effect on the Group's assets and value and on the position of the Bondholders.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be medium.

Risks related to early redemption

Pursuant to the Terms and Conditions, the Bonds are subject to prepayment at a price of 101 per cent. of the nominal amount of the Bonds at the option of each bondholder if (i) in the case of a successful admission to listing, the Bonds cease to be admitted to listing, or (ii) any person or group of persons acting in concert (other than the AccentEleven Holding Limited) acquires control over the Issuer, where "control" means (a) acquiring or controlling, directly or indirectly, more than fifty (50) per cent. of the voting shares of the Issuer, or (b) the right to, directly or indirectly, appoint or remove the whole or a majority of the members of the board of directors of the Issuer. There is, however, a risk that the Issuer will not have sufficient funds at the time of such prepayment to make the required prepayment of the Bonds which could adversely affect the Issuer, for example by causing insolvency or an event of default under the Terms and Conditions, and thus adversely affect all Bondholders and not only those that choose to exercise the option.

Furthermore, pursuant to the Terms and Conditions, if Bonds representing more than twenty per cent. of the Bonds outstanding immediately prior to the exercise of a put option (not including any Bonds held by any Group Company or any of their affiliates) have been repurchased as a result of the exercise of the put option as described above, the Issuer is entitled to repurchase all the remaining Bonds at a price equal to 101 per cent. of the nominal amount. There is a risk that the market value of the Bonds is higher than the early redemption amount and that it may not be possible for Bondholders to reinvest such proceeds at an effective interest rate as high as the interest rate on the Bonds and thus may only be able to do so at a significantly lower rate.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be medium.

Risks relating to the transaction security

The Issuer's obligations under the Bonds are secured by first priority pledges over the shares in the Issuer and in certain of the Issuer's direct and indirect subsidiaries, as well as security over any current and future intragroup loans provided by the Issuer to Hoist Group Holding AB and security over business mortgage certificates issued by certain direct and indirect subsidiaries (the "**Transaction Security**") of the Issuer. The Bondholders share the security interest under the Transaction Security with other secured parties on the basis and subject to the provisions of an intercreditor agreement (the "**Intercreditor Agreement**") and the Bondholders will receive proceeds from an enforcement of the Transaction Security only after the financial indebtedness owed under a super senior revolving credit facilities agreement (the "**Super Senior RCF**") and hedging agreements (if any) have been repaid in full.

If the outstanding obligations of the Group towards the Super Senior RCF providers and the hedge counterparties (if any) increase or the Issuer issues additional bonds, the security position of the current Bondholders will be impaired. Furthermore, there is no guarantee that the value of the assets covered by Transaction Security will at all times cover the outstanding claims of the Bondholders.

The Bondholders are expected to be represented by Nordic Trustee & Agency AB (publ) as security agent (the "**Security Agent**") in all matters relating to the Transaction Security. The relationship between the secured parties and Nordic Trustee & Agency AB (publ), acting as Security Agent under the Bonds and as Agent for the Bondholders pursuant to the Terms and Condition will be governed by the Intercreditor Agreement. There is no guarantee that the Security Agent will act in a manner or give instructions preferable to the Bondholders.

The Bondholders and the other secured parties will be represented by the Security Agent, in all matters relating to the Transaction Security. There is a risk that the Security Agent, or anyone appointed by it, does not properly fulfil its obligations in terms of perfecting, maintaining, enforcing or taking other necessary actions in relation to the Transaction Security. The Transaction Security is subject to certain hardening periods (*återvinningstider*) during which times the secured parties do not fully, or at all, benefit from the Transaction Security.

Accordingly, there is a risk that in the event of enforcement of the Transaction Security, the Bondholders may not be able to recover the full extent of their losses from the enforcement proceeds, if at all.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be medium.

Risks related to the tenure of the Bonds

The Bonds and the credit facility under the Super Senior RCF do not have the same tenure and the Issuer may amortise and make prepayments under the credit facility under the Super Senior RCF without having to make corresponding amortisations or prepayments under the Bonds. The shorter tenor of the credit facility under the Super Senior RCF could have a negative impact on the interests of the Bondholders.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Risks relating to enforcement of the transaction security

If a subsidiary, whose shares have been pledged in favour of the Bondholders, is subject to any foreclosure, dissolution, winding-up, liquidation, recapitalisation, administrative or other bankruptcy or insolvency proceedings, the shares that are subject to such pledge may then have limited value because all of the subsidiary's obligations must first be satisfied, potentially leaving little or no remaining assets in the subsidiary for the Bondholders.

As a result, the Bondholders may not recover the full value (or any value in the case of an enforcement sale) of the shares. In addition, the value of the shares subject to pledges may decline over time.

The value of any intragroup loans granted by the Issuer to Hoist Group Holding AB, which are subject to security in favour of the Bondholders, are largely dependent on Hoist Group Holding AB's ability to repay such loans. Should Hoist Group Holding AB be unable to repay their debt obligations upon an enforcement of a pledge over the intragroup loans, the Bondholders may not recover the full or any value of the security granted over the intragroup loans.

The value of the business mortgages issued by certain direct and indirect subsidiaries of the Issuer, which are subject to security in favour of the Bondholders, are dependent on the value of the assets held by the subsidiaries at the time of the enforcement. Other than as set out in the Terms and Conditions the subsidiaries may dispose of its assets. In addition, the value of the assets may decrease if the assets are disposed of. Should this occur, the value of the granted security will be adversely affected and there is a risk that the Bondholders do not receive an amount corresponding to the amounts of the business mortgages.

If the proceeds of an enforcement are not sufficient to repay all amounts due under or in respect of the Bonds, then the Bondholders will only have an unsecured claim against the Issuer for the amounts which remain outstanding under or in respect of the Bonds subject to customary limitation language.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be medium.

Risks relating to release of Transaction Security

The Security Agent may at any time (without the prior consent of the Bondholders), acting on instructions of the secured creditors, release the Transaction Security and guarantees in accordance with the terms of the Intercreditor Agreement. Although the Transaction Security shall be released pro rata between the secured creditors and continue to rank pari passu between the secured creditors, such release will impair the security

interest and the secured position of the Bondholders, especially since the enforcement proceeds from the remaining Transaction Security are not distributed equally between the secured creditors.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Risks relating to the Security Agent acting on behalf of bondholders

Subject to the terms of the Intercreditor Agreement, the Security Agent is entitled to enter into agreements with the Issuer or a third party or take any other actions necessary for the purpose of maintaining, releasing or enforcing the Transaction Security or for the purpose of settling, among others, the secured parties and the bondholder's rights to the Transaction Security. Although there is a limitation set out in the Intercreditor Agreement that such actions shall not be taken if the Security Agent deems the action to be detrimental to the interests of the Bondholders, it cannot be guaranteed that actions will not be taken that may be considered to be detrimental in the view of some or all of the Bondholders. The aforementioned limitation does not apply to release provisions set out in the Terms and Conditions, the Intercreditor Agreement or the documents which governs the Transaction Security. Certain of the subsidiaries of the Issuer have granted guarantees and security in relation to the Issuer's and other Group Companies' obligations under the Finance Documents (as defined in the Intercreditor Agreement). The secured parties' right to payment under those guarantees and security is subject to, among other things, the availability of funds, legal restrictions and the terms of each guarantor's indebtedness.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

The Agents' and other charges may rank ahead of secured parties when receiving enforcement proceeds.

The proceeds from an enforcement of the Transaction Security will be applied in accordance with the terms of the Intercreditor Agreement pursuant to which certain fees to, inter alios, the Security Agent as well as certain costs and indemnifications will be paid by the Security Agent before applying proceeds to the Bondholders and the other secured parties.

The proceeds of an enforcement of Transaction Security will be applied in accordance with the terms of the Intercreditor Agreement pursuant to which the super senior creditors (if any) will be paid by the Security Agent before applying proceeds to the Bondholders.

If the proceeds of an enforcement sale are not sufficient to repay all amounts due on or in respect of the Bonds, the Bondholders will only have an unsecured claim against the remaining assets (if any) in the Issuer for the amounts which remain outstanding on or in respect of the Bonds.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Structural subordination and insolvency of subsidiaries

A significant part of the Group's assets and revenues relate to the Issuer's subsidiaries. The subsidiaries are legally separated from the Issuer and the subsidiaries' ability to make payments to the Issuer is restricted by, among other things, the availability of funds, corporate restrictions and law restriction. Furthermore, in the event of insolvency, liquidation or a similar event relating to one of the subsidiaries, all creditors of such subsidiary would be entitled to payment in full out of the assets of such subsidiary before any entity within the Group, as a shareholder, would be entitled to any payments. Thus, the Bonds are structurally subordinated to the liabilities of the subsidiaries. The Group and its assets may not be protected from any actions by the creditors of any subsidiary of the Group, whether under bankruptcy law, by contract or otherwise. In addition, defaults by, or the insolvency of, certain subsidiaries of the Group could result in the obligation of the Group to make payments under parent company financial or performance guarantees in respect of such subsidiaries' obligations or the occurrence of cross defaults on certain borrowings of the Group.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Security over assets granted to third parties

The Group may, subject to limitations, incur additional financial indebtedness and provide security for such indebtedness. In the event of bankruptcy, reorganisation or winding-up of the Issuer, the Bondholders will be subordinated in right of payment out of the assets being subject to security. In addition, if any such third party financier holding security provided by the Group would enforce such security due to a default by any Group Company under the relevant finance documents, such enforcement could have a material adverse effect on the Group's assets, operations and ultimately the position of the Bondholders.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Corporate benefit limitations in providing security and guarantees for third parties

Under the Terms and Conditions Hoist Group Holding AB shall guarantee all amounts outstanding under the Finance Documents, including but not limited to the Bonds. In addition, under Swedish law, if a limited liability company guarantees or provides security for another party's obligations without deriving sufficient corporate benefit therefrom, the granting of the guarantee or security will require the consent of all shareholders of the grantor and will only be valid up to the amount the company could have distributed as dividend to its shareholders at the time the guarantee or the security was provided. If no corporate benefit is derived from the provided guarantee or security, such guarantee or security will be limited in validity as aforesaid. Consequently, the security granted by a subsidiary of the Issuer could be limited in accordance with the aforesaid which could have an adverse effect on the Bondholders' security position.

The Company assesses the likelihood of the above mentioned risks occurring to be low. If the risks were to occur, the Company considers the potential negative impact to be low.

Overview

The Group was established in 1994 and provides hospitality technology systems, products and services to independent hotels and hotel chains in EMEA. The Group has a comprehensive data centric service offering built around a proprietary software solution which manages complex solutions and business intelligence needs for the Group's customers. The Group's operations are carried out through six main segments which are connected through the fusion dashboard and comprises TV systems, internet access, guest content (e.g. sport channels, apps and video-on-demand), locks and mobile keys, property management software and managed networks, which allows all solutions to be monitored in a single system. The Group's data centric offering is fully business-to-business and mostly comprises complex, integrated solutions which can increasingly only be provided by large and sophisticated providers. The Group's revenue base exhibits diversification across geographies, product groups and customer types with a strategic focus on mid-market and high-end hotels. The Group sources hardware externally and complements it with proprietary software to create customised solutions to meet customer needs. The Group also offers installation, support and service. The Group focuses on nine key regions; Sweden, Norway, Denmark, Finbalt (Finland, Estonia, Latvia, Lithuania), UK & Benelux, France, DACH (Germany, Austria, Switzerland), MED (Italy, Turkey, Spain, Portugal) and MEA (United Arab Emirates, Saudi Arabia), with offices in 17 countries and around 450 employees for the financial year ended 31 December 2020.

Business

Business Model

The Group has a resilient business model with recurring and contracted revenues, a dispersed blue-chip customer base and a mission critical offering constituting a limited share of the customer's costs.

- The software subscription revenue model provides substantial earnings visibility and higher gross margins.
- The contractual nature of the business enables service revenues which are not dependent on hotel occupancy rates, providing clear downside protection.
- The Group serves more than 8,000 customers, suggesting limited customer specific risks.
- The Group's hospitality technology and proprietary software solution constitute an integral part of the hotels' operations.

In 2020, more than half of the Group's revenue stemmed from recurring contracts with long average durations, offering stable revenue streams and limiting the cyclical nature of the business. The remainder of the Group's revenue came from new business origination and several new contracts in EMEA.

Product Offering

The Group has a comprehensive data centric offering built around a proprietary software solution. This includes solutions for IPTV, Internet Access, Guest Content, Property Management Software, Locks & Mobile Keys and Managed Networks.

IPTV

The Group's product offering for IPTV systems includes a complete hotel TV solution including both hardware and software and covers the entire process from planning to installation and support. The Group offers hosted TV solutions with developed customised software through centralised content management systems enabling hoteliers to design targeted guest communications at local or brand level. The digital signage system that the Group provides allows hoteliers to share information, market its brand and inform about promotions through the hotels' own TV channels and monitors which can be placed at various strategic locations. The Group's IPTV solutions also allows guests to stream their own content onto hotel TV's with access to over 200,000 TV shows and apps.

Internet Access

The Group offers planning and installation of high-speed internet solutions embracing the latest networking technologies. The internet access solutions comprise customised internet access portals and easy-access customised conference services. By allocating the bandwidth to each user, the hotel can ensure that they always have a fast connection for the hotel's own systems as well as for their guests. The infrastructure for the IT environment includes redundancy systems, back-up services, firewalls and virus protection.

Guest Content

The Group offers TV channels, video on demand, streaming services and cast to TV, customising TV packages based on viewer rating, language preferences and information from hotel guests. The guest content offering combines video on demand with the latest films from major Hollywood and independent studios and streaming services pursued through partnerships. Hotel guests can also watch TV on their own devices through the streamed TV channels via WiFi.

Property Management Software

The Group has its own property management system, HotSoft, fully integrated with online booking services. HotSoft is an in-house developed proprietary software available through a cloud solution and consisting of several fully-integrated modules for the hotel's daily operations, such as front and back office, online reservation, property management, sales and marketing and other features that support all kinds of businesses. The Group also has its own online reservation system, HotelEngine, which is a real-time solution that can be seamlessly integrated to the customer's own website and the Group's property management systems. The software enables hotels to manage daily operations more easily by increasing control over bookings flow and finances. The software offers responsive design meaning that it runs smoothly on any kind of device, including smartphones, tablets and computers.

Serviator is a user-friendly back-office system that enables hotels to streamline their work processes and increase their level of service provided to their guests. Some of Serviator's many features are related to cleaning, maintenance, room overview, checklists, lost and found, minibar, reports and statistics and room service. The software also collects and uses big data to analyse trends in guests' behaviours, staff efficiency and performance. By supporting pre-arrival and post-departure guest care, the software enables increased guest experience and guest loyalty.

Locks & Mobile Keys

The Group's electronic door opening solutions are both easy to use and secure and can be opened with key cards as well as with mechanical backup keys. The locks can be integrated with the major reservation systems, including the Group's fusion dashboard and property management system, HotSoft, which aims to simplify the hotel experience for both guests and hotel staff. The mobile key solution allows guests to check in online and receive their room key via an app, allowing them to use their phone as a virtual key. The virtual key function enables them to manage their whole hotel stay, including booking, checking-in, paying and checking-out, through their smart phone.

The Group also offers minibars, as well as hotel interior and guest amenities that can be purchased through the Group's web shop. The web shop carries items such as beds, mattresses, pillows and products within the Group's own label "Spa Vital".

Managed Networks

The Group designs, installs and manages converged IP networks and applications for hotels, assuming full responsibility of the customers' network administration. By converging the local IP network and running all chosen applications with certified hardware, deployment and support, the Group can optimise both the hotel's investment capital expenditures and its recurring operational expenditures. The Group monitors and has remote access to all live IP equipment on the hotels' network through its internal network operations centre while the customers retain complete visibility and control of the services and infrastructure via the Group's dashboard.

Customer Overview

The Group's offering is primarily directed towards hotels, primarily large international chains and independent hotels, but also towards other customer segments including other hospitality providers such as serviced apartments, healthcare providers, prisons, detention facilities, and large private corporations. The Group's customer base is diversified with the largest customer having multiple individual contracts which, in aggregate, account for less than five per cent. of the Group's 2020 revenue. The ten largest customers account for only 26 per cent. of the Group's 2020 revenue and they comprise of: Marriott, Scandic Hotels, Accor Hotels, Hilton, IHG, Best Western, Rezidor, Maritim, Elite Hotels and Euro Disney.

Customers Financing Solutions

The Group offers comprehensive equipment leasing solutions (e.g. where the customer pays a monthly leasing fee over the tenor of the leasing contract) which enable customers to purchase and offer to their guests the latest

products and services without having to incur the capital expenditures upfront. In the event of non-payment, customers' equipment can be switched off, which creates a potential incentive for customers to make monthly payments in order to avoid a loss of business-critical services.

Sales

The Group has approximately 92 sales representatives and an international sales team maintaining strong relationships with key customers at a central level. The international sales team is based in London but with team members dispersed into multiple key cities such as Madrid, Helsinki and Vienna. The international sales team secures approval for the Group's products and services to be deployed to the top 10 largest international hotel chains in EMEA. The international sales team also looks after a network of channel partners outside of our geographies to help support the deployment of the Group's products and services to our partner chains in these regions.

Dependency on subsidiaries

As described in section "*Risk Factors – Structural subordination and insolvency of subsidiaries*", a significant part of the Group's assets and revenues relate to the Guarantors' direct and indirect subsidiaries. The Issuer is therefore dependent upon receipt of sufficient income and cash flow related to the operations of the other companies within the Group to service its debt under the Bonds. The transfer of funds to the Issuer from other Group Companies may be restricted or prohibited by legal and contractual requirements applicable to the respective subsidiaries.

Limitations or restrictions on the transfer of funds between companies within the Group may become more restrictive in the event that the Group experiences difficulties with respect to liquidity and its financial position, which may negatively affect the Group's operations, financial position and earnings and in turn the performance of the Issuer under the Bonds.

Litigation

As of the date of this Prospectus neither the Issuer, the Guarantors nor the Group is involved in any governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened of which the Issuer is aware), and has not been for the last 12 months, which may have, or have had in the recent past, significant effects on the Issuer's, the Guarantors' and/or the Group's financial position or profitability.

No Significant Change in the Issuer's, the Guarantors' or the Group's Financial or Trading Position and Trend Information

There has been:

- (i) no significant change in the financial or trading position of the Issuer, the Guarantors or the Group since 31 December 2020;

- (ii) no recent events particular to the Issuer or the Guarantors and which are to a material extent relevant to an evaluation of the Issuer's or the Guarantors' solvency since 31 December 2020;
- (iii) no material adverse change in the financial position or prospects of the Issuer, the Guarantors or the Group since 31 December 2020; and
- (iv) no significant change in the financial performance of the Group since 31 December 2020.

In case of enforcement of the Security, any enforcement proceeds will first be applied towards repayment of the Financial Indebtedness incurred by the Issuer under the Super Senior RCF and secondly towards redemption of the Bonds.
